## Caution Regarding Forward Looking Information

This report may contain forward-looking statements that reflect our current expectations or forecasts of future events. Forward-looking statements include statements that are predictive in nature, that depend upon or refer to future events or conditions, or that include words such as “anticipates”, “believes”, “estimates”, “expects”, “intends”, “may”, “plans”, “potential”, “proposed”, or future or conditional verbs such as “will”, “should”, “would” and “could”, and similar forward-looking expressions or negative versions thereof. In addition, any statement that may be made concerning future performance, strategies or prospects, and possible future Fund action, is also a forward-looking statement.

By their very nature, forward-looking statements involve numerous assumptions and are subject to inherent risks and uncertainties, which give rise to the possibility that the Fund’s predictions, forecasts, projections, expectations, and conclusions will not prove to be accurate, and that its assumptions may not be correct.

Forward-looking statements are not guarantees of future performance, and actual events could differ materially from those expressed or implied in any forward-looking statements made by the Fund. A variety of factors, many of which are beyond the Fund’s control, may cause actual results to differ materially from the expectations expressed in the forward-looking statements. These factors include, but are not limited to, general economic, political and relevant market factors in North America and internationally, interest and foreign exchange rates, volatility of equity and capital markets, business competition, technological change, changes in government regulations, unexpected judicial or regulatory proceedings, catastrophic events, outbreaks of disease or illness that affect local, national or international economies, and other risks described in the Fund’s current simplified prospectus. The foregoing list of factors is not exhaustive.

Forward-looking statements are issued in good faith and may be modified without notice. Before making any investment decisions, investors and others relying on forward-looking statements should carefully consider the foregoing factors and the uncertainties and risks they contain. We caution readers not to place undue reliance on these forward-looking statements. Unless required by securities law, we do not undertake to update any forward-looking statement, whether written or verbal, that may be made from time to time by or on behalf of the Fund. The forward-looking statements contained in this document are presented for the purpose of assisting readers in understanding the Fund’s financial position and results of operations as at and for the periods ended on the dates presented and may not be appropriate for other purposes.

# Management Discussion of the Performance of the CWB Onyx North American Equity Fund

## Results of Operations

In the first six months of 2025 (the “period”), the CWB Onyx North American Equity Fund’s (the “Fund”) net assets decreased by \$1,247,951 to \$40,094,919. This reflects an increase of \$649,936 from investment performance, net withdrawals of \$1,788,666, and distributions to unitholders of \$109,221.

The Fund returned 1.50% over the period versus the Fund’s internal benchmark (the “Fund Benchmark”), which returned 8.39%. The Fund Benchmark is a combination of 50% S&P TSX Composite Total Return (“TR”) Index<sup>1</sup>, 25% S&P 500 TR Index \$CAD<sup>2</sup> and 25% MSCI All Country World Index (ACWI) ex-USA TR \$CAD<sup>3</sup>. The Fund’s general market index benchmarks, the S&P/TSX Composite TR Index and the S&P 500 Composite TR Index (the “Broad-Based Benchmarks”), returned 10.17% and 0.57%, respectively, over the period. Unlike the Fund Benchmark and the Broad-Based Benchmarks, the Fund’s return is calculated after the deduction of fees and expenses.

Canadian equities performed well in the first half of 2025 with the S&P/TSX Composite ending June at an all-time high. The combination of weak economic growth and higher than hoped for inflation meant the Bank of Canada (BoC) had to walk a cautious line on interest rate cuts, leading to two rate cuts over the period (both in the first quarter). The BoC lowered its benchmark rate from 3.25% to 2.75%.

Although many of the world’s central banks have also cut interest rates this year, the U.S. has been an outlier with no rate cuts in the first half of the year by the Federal Reserve (the Fed).

Strong corporate earnings growth helped propel markets higher even as the impact of ever-changing U.S. tariff policies offered a headwind. Other positives during the period were excitement over artificial intelligence and the continued upward movement in gold prices (up 24% year to date) as a hedge against U.S. uncertainty. Returns for Canadians in the U.S. market was held back somewhat by a strengthening Canadian dollar.

European stock markets were global leaders in performance over the period after several years of relative underperformance. The Fund does not own any securities outside of North America which was the main contributor of underperformance relative to the Fund Benchmark over the period.

From a sector perspective, top contributors to Fund performance relative to its benchmark were real estate, financials and consumer discretionary. Stock selection in communication services, industrials and materials detracted from performance.

Top individual holdings that contributed positively to performance included Apple, Fabrinet and McKesson. The Fund also benefited from not owning Tesla. Exposure to UnitedHealth Group, Methanex and TFI detracted from performance.

## Recent Developments

On June 11, 2024, National Bank of Canada announced its intention to acquire Canadian Western Bank, the parent company of CWB Wealth Management Ltd. (“CWB WM”) at that time. On February 3, 2025, National Bank of Canada completed its acquisition of Canadian Western Bank resulting in a change in control of CWB WM. Also on February 3, 2025, CWB WM became a subsidiary of National Bank of Canada and certain additional entities became related parties to the Fund. The change in control of CWB WM had no material effect on the business, operations or affairs of the Fund during the period.

Investors are awaiting clarity on tariffs promised by August 1<sup>st</sup> after several false-start announcements. There continues to be a high level of uncertainty and change coming from the current U.S. administration making forecasting difficult. That said, investors are generally expecting below average economic growth (sub 2%) in most developed markets and inflation to be more or less under control with the U.S. a potential outlier. In such an environment, the market is expecting central banks in both Canada and the U.S. to both lower target interest rates in the back half of the year.

## Related Party Transactions

CWB WM serves as trustee, manager, and portfolio advisor of the Fund. The Fund pays CWB WM a management fee as compensation for its services. Refer to the section titled ‘Management Fees’ for a summary of fees paid to CWB WM.

As portfolio advisor, CWB WM may make decisions, including the selection of markets and dealers and the negotiation of commissions, with respect to the purchase and sale of portfolio securities, certain derivative products and the execution of portfolio transactions. National Bank Financial Inc. (NBF), a subsidiary of National Bank of Canada, became a related party to the Fund on February 3, 2025. From this date, when NBF became a related party to the Fund, to the end of the period, no brokerage business was allocated by the portfolio advisor to NBF.

CWB WM is party to a participating dealer agreement (the “Dealer Agreement”) with Canadian Western Financial Ltd. (“CWF”), a subsidiary of CWB WM. Pursuant to the Dealer Agreement, CWB WM pays CWF a monthly trailing commission equal to 1/12th of 0.50% of the net asset value attributable to units of the Fund held by CWF clients. This trailing commission will be paid directly by CWB WM and will not increase the management fee paid to CWB WM by the Fund.

<sup>1</sup> This information is derived from the Fund's unaudited interim or audited financial statements (as applicable). All figures presented are prepared in accordance with IFRS, which requires the Fund to measure the fair value of its investments based on close market prices, where the close market price falls within the bid-ask spread, which is consistent with the method used in measuring the net asset value for transactions with unitholders.

<sup>2</sup> Net assets and distributions are based on the actual number of units outstanding at the relevant time. The increase (decrease) from operations is based on the weighted average number of units outstanding over the financial period.

<sup>3</sup> Distributions were paid in cash, reinvested in additional units of the Fund or both.

<sup>1</sup> This information is provided as at June 30 of the year shown unless otherwise stated.

<sup>2</sup> Management expense ratio ("MER") is based on total expenses (excluding commissions and other portfolio transaction costs) for the stated period and is expressed as an annualized percentage of daily average net asset value during the period.

<sup>3</sup> The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the period.

<sup>4</sup> The Fund's portfolio turnover rate indicates how actively the Fund's portfolio adviser manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher a fund's portfolio turnover rate in a year, the greater the trading costs payable by the fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund.

## Management Fees

The Fund pays CWB WM a monthly management fee equal to 1/12th of 1.00% of the monthly net asset value of the Fund.

The management fee for the Fund is calculated and accrued weekly as a percentage of its NAV. The Fund's management fees were used by CWB WM to pay for the cost of managing the investment portfolio, providing investment analysis and recommendations, making investment decisions, making brokerage arrangements for the purchase and sales of investment portfolio, providing other services, and compensating CWB WM for acting as the trustee of the Fund. CWB WM also used the management fee to fund trailing commissions and any other compensation to CWF whose clients invest in the Fund. A further breakdown of the management fee is not available for the interim period.

Series O management fee is negotiated and paid directly by each investor. Series O management fee is not to exceed the Series A management fee of the Fund.

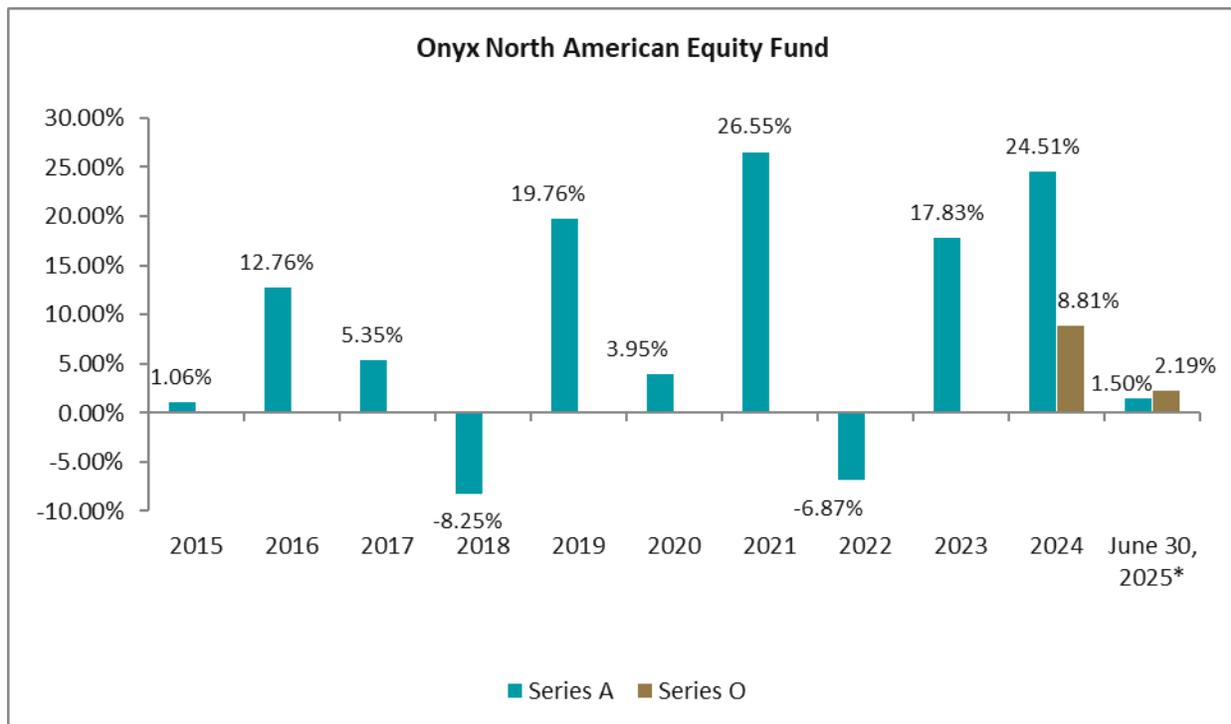

## Past Performance

The past performance of the Fund is set out in the following charts. The performance information shown assumes that all distributions made by the Fund in the years shown were reinvested in additional securities of the same series of units of the Fund and would be lower if distributions were not reinvested. The performance information does not take into account sales, redemption, distribution, or other optional charges, or income taxes payable that would have reduced returns or performance.

Mutual fund returns are not guaranteed. Please note that past performance is not indicative of future performance.

## Year-by-Year Returns

The following bar chart shows the Fund’s annual performance in each of the periods shown and illustrates how the Fund’s performance has changed from period to period. The chart below shows, in percentage terms, how an investment made on January 1 would have increased or decreased by December 31, unless otherwise noted.

\*Return from January 1, 2024 to June 30, 2025, not annualized.
