## Caution Regarding Forward Looking Information

This report may contain forward-looking statements including, but not limited to, statements about the Fund, its strategy, risks, expected performance and condition. Forward-looking statements include statements that are predictive in nature, that depend upon or refer to future events or conditions, or that include words such as “anticipates”, “believes”, “estimates”, “expects”, “intends”, “plans”, “may”, or future or conditional verbs such as “will”, “should”, “would” and “could”, and similar forward-looking expressions or negative versions thereof. In addition, any statements that may be made concerning future performance, strategies or prospects, or anticipated Fund changes or other actions (including those described in the Recent Developments section of this report), are also forward-looking statements.

Forward-looking statements are based on current expectations and projections about future general economic, political, and relevant market factors, such as interest rates, foreign exchange rates, equity and capital markets, and the general economic and business environment, in each case assuming no material changes to applicable tax or other laws, government regulations, or policies.

By their very nature, forward-looking statements involve numerous assumptions and are subject to inherent risks and uncertainties, which give rise to the possibility that the Fund’s predictions, forecasts, projections, expectations, and conclusions will not prove to be accurate, and that its assumptions may not be correct.

Forward-looking statements are not guarantees of future performance, and actual events could differ materially from those expressed or implied in any forward-looking statements made by the Fund. A variety of factors, many of which are beyond the Fund’s control, may cause actual results to differ materially from the expectations expressed in the forward-looking statements. These factors include, but are not limited to, general economic, political, and relevant market factors in North America and internationally, interest and foreign exchange rates, equity and capital markets, business competition, technological change, changes in government relations, unexpected judicial or regulatory proceedings or decisions and catastrophic events, including natural disasters, pandemics, war and other risks described in the Fund’s current simplified prospectus. The above-mentioned list of important factors is not exhaustive.

Before making any investment decisions, investors and others relying on forward-looking statements should carefully consider the foregoing factors and the uncertainties and risks they contain. We caution readers not to place undue reliance on these forward-looking statements.

Forward-looking statements are issued in good faith and may be modified without notice. We assume no obligation to update forward-looking statements in the light of new information, future events, or other circumstances unless applicable legislation so requires.

# Management Discussion of the Performance of the CWB Onyx Conservative Solution Fund

## Investment Objectives and Strategies

The investment objective of the CWB Onyx Conservative Solution Fund (the “Fund”) is to provide investors with steady income and some capital appreciation, while preserving principal and reducing volatility.

The Fund invests in units of the CWB Onyx Canadian Equity Fund, the CWB Onyx Global Equity Fund and the CWB Onyx Diversified Income Fund (the “CWB Onyx Portfolio Series Funds”). We target an allocation of 25% in affiliated mutual funds that invest primarily in Canadian, U.S. and international equity securities, real estate investment trusts and similar investment vehicles. We target an allocation of 75% in affiliated mutual funds that invest primarily in Canadian, U.S. and international fixed income securities. We will position our equity and fixed income exposures within a +/- 10% range relative to the above target allocation.

## Risks

No changes to the Fund affecting the Fund’s overall level of risk were made during the 12-month period ended December 31, 2025 (the “Period”). The risks of investing in the Fund and the suitability of the Fund for investors remain as discussed in the Fund’s most recent simplified prospectus or any amendments or fund facts.

## Results of Operations

Over the Period, the Fund’s net assets decreased by \$6,293,118 to \$2,665,871. This reflects an increase of \$660,384 from investment performance, distributions to unitholders of \$685,346, and net withdrawals of \$6,268,156.

Series A units of the Fund returned 6.53% over the Period versus the Fund’s internal benchmark (the “Fund Benchmark”), a combination of FTSE Canada Universe Bond Index, S&P/TSX Composite Total Return (“TR”) Index, S&P 500 TR Index \$CAD and the MSCI All Country World Index (ACWI) ex-USA \$CAD, which returned 8.18% over the Period. The Fund’s general market index benchmarks, the FTSE Canada Universe Bond Index, and the S&P/TSX Composite TR Index (the “Broad-Based Benchmarks”), returned 2.64% and 31.68% respectively, over the Period. Unlike the Fund Benchmark and the Broad-Based Benchmarks, the Fund’s return is calculated after the deduction of fees and expenses. Returns for individual Series O unitholders of the Fund may vary, largely due to differences in fees and expenses.

President Trump was inaugurated for his second term in January and introduced comprehensive tariffs on multiple countries on April 2, an event termed “Liberation Day.” This announcement triggered a significant, though brief, market correction, as tariffs were delayed in some cases, reduced in others, or even raised. Most of Canada’s trade with the U.S. is covered under the Canada-United States-Mexico Free Trade Agreement (CUSMA) and thus largely exempt from these measures. However, ongoing uncertainty regarding U.S. policy and concerns over potential future tariffs contributed to subdued economic growth in Canada. With inflation near target, the Bank of Canada lowered its key interest rate from 3.25% to 2.25% in 2025 to support economic activity, while the U.S. maintained steady rates.

Equity markets performed strongly in 2025, driven by slowing inflation, reduced interest rates, and robust corporate earnings. International equities surpassed U.S. markets for the first time in several years.

The Fund was positioned to take advantage of this yield curve movement. Duration was a modest positive to returns versus the benchmark. The Fund's holdings in Preferred shares also helped performance, as did an overweight relative to the benchmark in credit.

The Fund maintained an overweight in equities and an underweight in fixed income relative to its benchmark through the period, which helped relative performance.

## Recent Developments

Economic growth in Canada is projected to remain below average in 2026 amid stable interest rates. The scheduled CUSMA review begins on July 1, with the U.S. signaling intentions to request substantial concessions from Canada as a condition for agreement renewal. Failure to renew CUSMA could negatively affect the Canadian economy and contribute to increased inflationary pressures in the United States.

### Acquisition of Canadian Western Bank by National Bank of Canada

On February 3, 2025, National Bank of Canada completed its acquisition of Canadian Western Bank resulting in a change in control of CWB WM. At that time CWB WM became a wholly owned subsidiary of National Bank of Canada.

### Anticipated Fund Termination

After the close of business on or about March 31, 2026, Series A units of the Fund will be terminated. At that time, units will be redeemed at their net asset value and proceeds distributed to unitholders.

The Fund will be terminated effective on or about June 1, 2026. Effective on or about May 22, 2026, Series O units of the Fund will no longer be made available for purchase in anticipation of the termination of the Fund, including any purchases made through a pre-authorized purchase plan. Any investor that does not redeem units of the Fund prior to the termination date will be entitled to receive their proportionate share of the Fund's remaining net assets.

## Related Party Transactions

CWB WM is the trustee and manager of the Fund. The Fund pays CWB WM a management fee as compensation for its services. Refer to the section titled 'Management Fees' for a summary of fees paid to CWB WM. On October 10, 2025, National Bank Financial Inc. ("NBF") became the portfolio advisor of the Fund. NBF is a wholly owned subsidiary of the National Bank of Canada and an affiliate of CWB WM.

The Fund invests in units of the CWB Onyx Portfolio Series Funds. These funds are related and connected issuers of the Fund, as CWB WM serves as trustee and manager for the CWB Onyx Portfolio Series Funds.

The Investment Review Committee (IRC) of the Fund has approved standing instructions permitting investments in the CWB Portfolio Series Funds, and other mutual funds managed by CWB WM or its affiliates (the "Fund of Fund Investing"). The standing instructions require that the Fund of Fund Investing be conducted in accordance with CWB WM policy and that CWB WM will advise the IRC of a material breach of the standing instructions.

CWB WM policy requires that an investment decision in respect of Fund of Fund Investing (i) is made free from any influence by an entity related to CWB WM and without taking into account any consideration relevant to an entity related to CWB WM; (ii) represents the business judgment of the portfolio manager/sub-advisor

uninfluenced by considerations other than the best interests of the Fund; (iii) complies with CWB WM policy; and (iv) achieves a fair and reasonable result for the Fund.

During the Period, CWB WM entered into a participating dealer agreement (the “Dealer Agreement”) with Canadian Western Financial Ltd. (“CWF”), an affiliate of CWB WM. Pursuant to the Dealer Agreement, CWB WM pays CWF a monthly trailing commission equal to 1/12th of 0.75% of the net asset value attributable to units of the Fund held by CWF clients. This trailing commission is paid directly by CWB WM and does not increase the management fee paid to CWB WM by the Fund. Effective November 24, 2025, National Bank Savings and Investments Inc. (“NBSI”) acquired the business of the CWF and assumed the Dealer Agreement. NBSI is an affiliate CWB WM.

<sup>1</sup> This information is derived from the Fund's audited annual financial statements. All figures presented are prepared in accordance with IFRS Accounting Standards, which require the Fund to measure the fair value of its investments based on close market prices, where the close market price falls between the bid-ask spread, which is consistent with the method used in measuring the net asset value for transactions with unitholders.

<sup>2</sup> Net assets and distributions are based on the actual number of units outstanding at the relevant time. The increase (decrease) from operations is based on the weighted average number of units outstanding over the financial period.

<sup>3</sup> Distributions were paid in cash, reinvested in additional units of the Fund or both.

Net asset value per unit	\$10.96	\$11.27	\$10.55	\$10.07	\$11.56

<sup>1</sup> This information is provided as of December 31 of the year shown unless otherwise stated.

<sup>2</sup> Management expense ratio ("MER") is based on total expenses (excluding commissions and other portfolio transaction costs) for the stated period and is expressed as an annualized percentage of daily average net asset value during the period.

<sup>3</sup> The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the period.

<sup>4</sup> The fund's portfolio turnover rate indicates how actively the fund's portfolio adviser manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all the securities in its portfolio once in the year. The higher a fund's portfolio turnover rate in a year, the greater the trading costs payable by the fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of a fund.

## Management Fees

The management fee for each applicable series of the Fund is calculated and accrued daily as a percentage of its NAV. The annual management fees and a breakdown of the services received in consideration of the management fees, as a percentage of the management fees, for each series are as follows.

Fund	Management Fee (% of NAV)	Distribution Costs (% of Management Fee)	Others* (% of Management Fee)
Onyx Conservative Solution Fund – Series A	1.30	49.70	50.30
Onyx Conservative Solution Fund – Series O	N/A	N/A	N/A

\* Includes investment advisory fees, administration fees, and other operating fees

The Fund's management fees were used by CWB WM to pay for the cost of managing the investment portfolio, providing investment analysis and recommendations, making investment decisions, making brokerage arrangements for the purchase and sales of investment portfolio, providing other services, and compensating CWB WM for acting as trustee of the Fund. CWB WM also used the management fee to fund trailing commissions and any other compensation to CWF whose clients invest in the Fund.

The Series O management fee is negotiated and paid directly by each investor and will not exceed the Series A management fee.

## Past Performance

The past performance of the Fund is set out in the following chart. The performance information shown assumes that all distributions made by the Fund in the years shown were reinvested in additional securities of the Fund and would be lower if distributions were not reinvested. The performance information does not consider sales, redemption, distribution, or other optional charges, or income taxes payable that would have reduced returns or performance.

Mutual fund returns are not guaranteed. Please note that past performance is not indicative of future performance.

## Year-by-Year Returns

The following bar chart shows the Fund’s annual performance in each of the periods shown and illustrates how the Fund’s performance has changed from period to period. The chart below shows, in percentage terms, how an investment made on January 1 would have increased or decreased by December 31, unless otherwise indicated.
